

Key topics:

Reforming of Ukrainian railways – how to create a competitive market for rail services:

- dependence of Ukraine's major commodity sectors on conditions of rail transportation
- effective tariff regulation of rail transportation market
- antimonopoly regulation of activity of Ukrzaliznytsia, PJSC, establishment of an independent regulator
- investment projects, anticipated volumes and sources of financing

Rolling stock - quantity and quality of the rolling stock required for implementation of the forward-looking model of development of Ukrainian railways:

- implementation of the program for upgrade of the railcar fleet in Ukraine
- pricing policy of car building and car repair companies
- safety of railcar fleet
- checkup of track facilities, railcar fleet and rolling stock as response to significant changes in cargo flows during the period of Ukraine's independence
- modernization and renewal of traction rolling stock

Rail transportation market – importance of clear long-term cooperation rules between Ukrzaliznytsya, PJSC and market operators:

- estimates of the required volume of railcar fleet based on the current and projected cargo base. Conditions for investing in specialized rolling stock
- impact of fleet management on the required number of rolling stock, cooperation between Ukrzaliznytsia and dispatching departments of independent operators.
- assessment of the shortage of mainline and shunting locomotives
- improving the efficiency of empty fleet management through the construction of second tracks in busy traffic directions
- development of port railway infrastructure
